

Accompagnés par leur enseignante et l'illustratrice-auteurice Mylo, les élèves de CM2 A de l'école Victor Hugo 2 ont participé à un projet de création d'histoires courtes en manga, proposé par la Direction des Affaires Culturelles et des Relations Internationales de la ville d'Épinay-sur-Seine.

Découvrez dans ce recueil leurs histoires sur la thématique du sport !

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion (United Nations 1994).

There are a number of reasons why the number of children in the world is increasing. One of the main reasons is that the number of children who are surviving to the age of 15 is increasing. This is due to a number of factors, including improved medical care, better nutrition, and a decrease in child mortality.

Another reason why the number of children in the world is increasing is that the number of children who are being born is increasing. This is due to a number of factors, including a decrease in the age at which women are having children, and an increase in the number of children who are being born to women who are already having children.

Le but de ce projet était de faire découvrir le métier de Mangaka en abordant toutes les étapes de création d'une histoire Manga (pitch, synopsis, storyboard, crayonné et encrage).

Nous avons choisi la thématique du sport pour marquer le fait que ce projet a eu lieu la même année que les Jeux Olympiques et Paralympiques de Paris. Les élèves ont ainsi eu l'occasion de raconter des histoires via des personnalités publiques ou des personnages originaux, abordant des sujets tel que : la compétition, l'esprit d'équipe, le fair-play, le dépassement de soi etc

LE SPORT EN MANGA

Accompagnés par leur enseignante Mme SCHMITT et l'autrice-illustratrice Mylo, les élèves de CM2 A de l'école Victor Hugo 2 ont créé un Manga sur la thématique du sport.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion (United Nations 1998).

There are a number of reasons why the number of children in the world is increasing. One of the main reasons is that the number of children who are surviving to adulthood is increasing. This is due to a number of factors, including improved medical care, better nutrition, and a decrease in child mortality.

Another reason why the number of children in the world is increasing is that the number of children who are being born is increasing. This is due to a number of factors, including a decrease in the age at which women are having children, and an increase in the number of children who are being born to women who are already mothers.

There are a number of challenges that are associated with the increasing number of children in the world. One of the main challenges is that there is a need for more resources to care for these children. This includes more schools, more health care, and more social services.

Another challenge is that there is a need for more jobs for parents. This is because many parents are unable to find work, and this can lead to poverty and other social problems. It is important that we find ways to create more jobs for parents, so that they can better care for their children.

There are a number of things that we can do to help address these challenges. One of the most important things is to invest in education. This includes building more schools, training more teachers, and providing more resources for students.

Another important thing is to invest in health care. This includes providing more medical care, better nutrition, and a decrease in child mortality. It is important that we ensure that all children have access to the care that they need to thrive.

There are a number of other things that we can do to help address these challenges. This includes providing more social services, creating more jobs for parents, and ensuring that all children have access to the resources that they need to succeed.

It is important that we work together to address these challenges. This includes governments, parents, and the community. We need to ensure that all children have the opportunity to thrive, and that we are creating a better future for all of us.

There are a number of ways that we can measure the success of our efforts. One of the most important ways is to look at the number of children who are surviving to adulthood. This is a key indicator of the health and well-being of a population.

Another important way to measure success is to look at the number of children who are going to school. This is a key indicator of the quality of education that children are receiving. It is important that we ensure that all children have access to a good education.

There are a number of other ways that we can measure success. This includes looking at the number of children who are living in poverty, the number of children who are being abused, and the number of children who are being trafficked. It is important that we ensure that all children are living in a safe and healthy environment.

It is important that we continue to work together to address these challenges. This includes governments, parents, and the community. We need to ensure that all children have the opportunity to thrive, and that we are creating a better future for all of us.
